

ManStat Resource Integration

The right resources, in the right place, at the right time.

An integrated solution for a flexible workforce

Optimise your most valuable resource - your employees

A new way of thinking about workforce management

ManStat is a comprehensive solution for organisations looking to take an integrated approach to managing workforce and operational systems. Based on more than 20 years of experience in the Service, Construction and Traffic Management industries, ManStat is specifically designed to handle a highly flexible yet complex workforce environment.

Workforce management in the modern business world is becoming increasingly complex. Organisations need to fully understand and apply a multitude of awards, while co-ordinating a wide range of projects, activities and resources. A good staff roster is no longer enough to prevent costly mistakes and the risk of regulatory non-compliance.

ManStat helps organisations to solve these problems in an integrated way, providing:

- *Scalability* - by streamlining administrative complexities, and enabling organisations to sustain flexible staff growth
- *Consistency* - by linking workforce management workflows to decisions and outcomes
- *Accuracy* - by eliminating the errors and manual adjustments associated with paper based rosters
- *Regulatory Compliance* - through a flexible award interpreter that ensures all pays are correctly recorded and processed
- *Increased Productivity* - by significantly reducing administrative overheads and transaction costs
- *Real Time Business Information* - allowing deeper visibility into workforce activities through customised reports
- a *Single Point of Entry* - for rostering, billing, invoicing and payroll.

An End to End Approach

Workforce Coordination

Free yourself to become more strategic. Coordinate organisational resources, functions and activities in an integrated manner.

With ManStat, you have complete control and visibility over all the elements - including employees and contractors; projects and logistics; materials and equipment.

Business rules and policy management

Embed policies, conditions and business rules into organisational practices.

Use ManStat's powerful features to interpret complex awards and contract conditions; create schedules based on your business rules; and find what you need when you need it, using a single source data path.

Integrated workflows

Improve productivity and minimise costly errors by integrating your organisational workflows and administrative processes.

ManStat ensures accuracy and consistency by providing a single point of entry for job bookings, scheduling, invoicing and payroll transactions.

The ManStat solution delivers maximum organisational effectiveness through total integration with your operational systems.
